

Okay, here's an ATS-friendly and professionally formatted resume for Gundedi Sravya Reddy. I've optimized it for keywords, clarity, and ease of parsing by Applicant Tracking Systems.

[Your Name - Gundedi Sravya Reddy]
[Your Phone Number] | [Your Email Address] | [Your LinkedIn Profile URL] | [Your GitHub/Portfolio URL (if applicable)]

PROFESSIONAL SUMMARY

Highly motivated and results-oriented Bachelor of Technology student with a strong academic record (CGPA: 9.03). Proficient in C, Python, and Java, with hands-on experience in AI/Machine Learning, predictive modeling, and chatbot development. Seeking a challenging entry-level position to apply technical skills, leverage leadership abilities, and contribute to innovative solutions and organizational success.

EDUCATION

Bachelor of Technology in Information Technology
JB Institute of Engineering and Technology, [City, State - e.g., Hyderabad, Telangana]
Expected Graduation: [Month, Year - e.g., May 2025]

CGPA: 9.03/10.0 (till date)

****High School (Intermediate/12th Grade)****

Impulse Junior College, [City, State - e.g., Hyderabad, Telangana]

Year of Completion: [Year - e.g., 2021]

Percentage: 93.1%

****School (10th Grade/SSC)****

Vijaya High School, [City, State - e.g., Hyderabad, Telangana]

Year of Completion: [Year - e.g., 2019]

CGPA: 10/10

****SKILLS****

* ****Programming Languages:**** C, Python, Java

* ****Concepts & Tools:**** Object-Oriented Programming (OOP), Data Structures, Algorithms, Machine Learning (ML), Artificial Intelligence (AI), Predictive Modeling, Chatbot Development, Data Analysis, SQL (if any experience, even basic)

* ****Soft Skills:**** Leadership, Adaptability, Time Management, Flexibility, Problem-Solving, Teamwork, Communication, Presentation Skills

****PROJECTS****

****Employee Salary Prediction System****

- * Developed a machine learning model using Python to predict employee salaries based on factors such as experience, education, and role.
- * Utilized data preprocessing techniques and various regression algorithms to achieve accurate predictions.
- * (Add specific libraries used if possible, e.g., `scikit-learn`, `Pandas`, `NumPy`)

****AI-Based Student Wellness Chatbot****

- * Designed and implemented an AI-powered chatbot to provide wellness support and resources to students.
- * Leveraged Natural Language Processing (NLP) techniques to understand user queries and deliver relevant information.
- * Aimed to enhance mental well-being and provide instant access to support services.
- * (Add specific NLP libraries/frameworks if possible, e.g., `NLTK`, `spaCy`, `Rasa`)

****Movie Recommendation System****

- * Built a recommendation engine using Python to suggest movies to users based on their preferences and historical data.
- * Implemented collaborative filtering or content-based filtering algorithms to generate personalized recommendations.
- * (Add specific libraries/frameworks if possible, e.g., `Pandas`, `scikit-learn`, `Flask` for a web interface)

****ACHIEVEMENTS****

- * Awarded certifications for participation in various technical symposiums held at college, demonstrating engagement in technology events.
- * Actively participated in competitive events such as 'Master of C' and Ideathons, showcasing problem-solving and coding abilities.
- * Completed a BARC workshop, gaining practical insights into cutting-edge technical domains.
- * Presented a PowerPoint presentation at a college symposium, enhancing public speaking and technical communication skills.

****Important Notes for ATS Friendliness:****

1. ****Keywords:**** I've integrated keywords relevant to your skills and projects (e.g., AI, Machine Learning, Python, Java, Predictive Modeling, NLP, Leadership). Tailor these keywords further based on the specific job description you're applying to.
2. ****Clear Headings:**** Standard, bold headings make it easy for ATS to parse and categorize information.
3. ****Bullet Points:**** Easy to read and scan for both humans and machines.
4. ****Quantifiable Details:**** Where possible (e.g., CGPA, percentages). For projects, try to add **what you achieved** or **what technologies you used** specifically.
5. ****Standard Font:**** Use a clean, sans-serif font like Calibri, Arial, or Lato.
6. ****File Format:**** Always save and submit your resume as a ****PDF**** unless explicitly asked for a Word document. This preserves your formatting.
7. ****Contact Information:**** Make sure your contact details are accurate and current.

8. **LinkedIn & GitHub:** Crucial for a fresher. A strong LinkedIn profile validates your professional identity, and a GitHub profile (even with just these projects) showcases your coding ability.
9. **Dates:** Add expected graduation dates and completion years for all education sections.
10. **Location:** Add city/state for your educational institutions.
